TO BAY OF PIGS

Cuba: The Castro regime informed the American Embassy on 23 May that it intends to build facilities at the entrance to the US Naval Base at Guantanamo Bay to control the entrance and exit of persons and vehicles. The embassy was informed that the purpose of this measure is "to capture the entirety of the dollars" earned by Cubans on the base. The 3,500 Cuban employees at the base earn about \$600,000 a month. The regime will require "documentation" of each Cuban employee, a measure that will permit tight controls over personnel there for political purposes as well.
